

Sufyan Menk

Seeking to expand my knowledge of Computer Science, gain industry experience and have fun along the way.

Technical Skills

- Programming languages: Java, C, C++, Objectives-C, Python, MySQL, Bootstrap, HTML, CSS, JavaScript, PHP, Clojure, and Haskell.
- I am very detail oriented, organized, and have a good work ethic.
- Experienced in Android Studio, Xcode, IntelliJ IDEA, Oracle SQL Developer, JavaFX, and the Microsoft Office Suite.
- Operating Systems: Windows, OSX, Linux.

Work Experience

Chicago Public Schools HQ

Chicago IL

Internship

June 2013 – August 2013

- My responsibilities included assisting with the transition from the old CPS website to the new one. I siphoned through hundreds of old files and prioritized, which files needed to be kept. Another responsibility I had was to make website templates for schools that could be used easily and result in a professional website. I produced tutorial videos on how to install and use the templates.

Projects

View on App Store

Makki Masjid Chicago iOS Application (v1.0.8)

- Developed this application to help my local mosque get information to their members. It includes prayer times, news, and contact information about the mosque. As of today (2/22/16), the app has 280+ downloads. I am still releasing updates to the app on a regular basis, and have plans to make an Android version soon.

Education

- Illinois Institute of Technology
 - Bachelor of Science in Computer Science
 - 4 time on the dean's list
 - Current GPA: 3.6
- Northside College Prep. High School
 - GPA: 3.6

Expected to graduate in 2017

Graduated in 2013
